## Problem description.

An Institute is organising an programming contest.The office team of institute asks the students to submitted their application form for various posts in contest.And also asks them to put their student id ( **X** ) in the application form.After few days when the office team was selecting the application forms they found that some of the students have applied for multiple posts which was not allowed.There were many applications so they can't find total students for disqualifying the students.So the office team contact you to create a program to find out those students and remove their application form.

**Note** : Student ID consist of only numerical digits.

**Successful Submissions**

## Input

- The first line of the input contains an integer **T** denoting the number of test cases.  
The description of **T** test cases follows.
- The first line of each test contains the number of application forms **N**
- The next line contains the student ID of each application form **X**

## Output

- For each test case, output a single line containing the student IDs of those application form which is eligible.

## Constraints

- $1 \leq T \leq 10^2$
- $1 \leq N \leq 10^3$
- $1 \leq X \leq 10^3$

## Example

**Input:**

```
2
5
15 1 5 1 70
11
3 47 5 88 5 7 5 7 2 99 2
```

**Output:**

```
15 5 70
3 47 88 99
```

## Explanation

**Example case 1.** In first test case the application form with student ID **5 , 7 , 2** have applied for respectively **3 , 2 , 2** posts in contest so that their application forms for every post is rejected.

### [CodeChef \(http://www.codechef.com/\)](http://www.codechef.com/) - A Platform for Aspiring Programmers

CodeChef was created as a platform to help programmers make it big in the world of algorithms, **computer programming** and **programming contests**. At CodeChef we work hard to revive the geek in you by hosting a **programming contest** at the start of the month and another smaller programming challenge in the middle of the month. We also aim to have training sessions and discussions related to **algorithms**, **binary search**, technicalities like **array size** and the likes. Apart from providing a platform for **programming competitions**, CodeChef also has various algorithm tutorials and forum discussions to help those who are new to the world of **computer programming**.

### [Practice Section \(https://www.codechef.com/problems/easy\)](https://www.codechef.com/problems/easy) - A Place to hone your 'Computer Programming Skills'

Try your hand at one of our many practice problems and submit your solution in a language of your choice. Our **programming contest** judge accepts solutions in over 35+ programming languages. Preparing for coding contests were never this much fun! Receive points, and move up through the CodeChef ranks. Use our practice section to better prepare yourself for the multiple **programming challenges** that take place through-out the month on CodeChef.

### [Compete \(https://www.codechef.com/problems/easy\)](https://www.codechef.com/problems/easy) - Monthly Programming Contests and Cook-offs

Here is where you can show off your **computer programming skills**. Take part in our 10 day long monthly coding contest and the shorter format Cook-off **coding contest**. Put yourself up for recognition and win great prizes. Our **programming contests** have prizes worth up to INR 20,000 (for Indian Community), \$700 (for Global Community) and lots more CodeChef goodies up for grabs.
